EXECUTIVE SUMMARY

Dear Margaret, this report summarises the performance of your investment portfolio for the calendar year ending 31 December 2025, and sets out our recommendations for the year ahead.

Your portfolio delivered a total return of **+9.4%** over the period, ahead of your strategic benchmark of +7.1%. Global equities continued to provide the primary driver of growth, whilst your fixed income allocation provided stability during periods of heightened market volatility in Q3.

We recommend no change to your risk profile at this time. Your overall financial position remains well-aligned with your medium-term objectives, including the planned retirement drawdown commencing 2031.

RECOMMENDATIONS FOR 2026

01 Increase your ISA contribution to £20,000 for the 2026/27 tax year to maximise tax-efficient growth ahead of your drawdown phase. Your current contribution of £15,000 leaves £5,000 of allowance unused.

02 Rebalance the global equity weighting from 46% to 42%, redirecting £19,500 into the fixed income allocation. This moves the portfolio closer to target as markets approach historically elevated valuations.

03 Review the cash holding in light of the current interest rate environment. We suggest switching £15,000 from the money market fund into a 12-month fixed-rate cash ISA at 4.65% AER, subject to your liquidity needs.

04 Consider a nominated beneficiary review for your pension plan, particularly in light of the changes announced in the Autumn 2025 Budget regarding inherited pension taxation from 2027.

NEXT STEPS

Your next scheduled review is due in May 2027. However, James will be in contact quarterly with a brief portfolio update. If your circumstances change materially — including income, expenditure, or tax position — please contact us promptly so we can reassess the suitability of your current strategy.
